

RESIDENTIAL HIGH EFFICIENCY TOILET REBATE PROGRAM

Tucson Water's Residential Toilet Rebate Program is for replacement of pre-1991 toilets with High Efficiency (HET) models that use 1.3 gallons or less per flush.

Tucson Water offers its customers rebates of one-half the price of a new HET toilet, up to \$120 per unit for residential (\$200 maximum per household). Only fixtures purchased after July 7, 2008, qualify for a rebate.

To ensure that new toilets both save water and are effective at flushing, only HET models certified by the [EPA WaterSense Program](#) will be eligible for rebates. Click on one or more of the following links for information or call (520) 791-4331.
